

HUNDAL

**HUNDAL
FORKLIFT
H30**

BUILT TO WORK.

BUILT TO LAST.

ELECTRIC

Meet the All-New Electric **HUNDAL** FORKLIFT H30. Clean Power. Serious Lifting.

BASIC SIZE

Rated lifting capacity	3000kg
Full length without fork	2550mm
Full length with fork	3520mm
Full width	1250mm
Height of non-lifting gantry	2130mm
Height of roof protection frame	2070mm
Maximum height during operation	3780mm
Wheelbase (of a vehicle)	1720mm
Min. ground clearance	120mm
portal frame	150mmH

ENERGY

Boost motor power	Ac 7.5kw
Driving motor power	Ac 7.5kw
Steering line type	Hydraulic booster
Charger input voltage	220V
Charging time	9-11h
Battery capacity	200ah
rated voltage	72V
Battery brand	CHILWEE
Number of batteries	12

PARAMETERS

Maximum lifting height under no load	3000mm
Free lifting height	3000mm
Angle of inclination of portal frame (front/back)	5°/13°
Total machine mass under no load	4100kg
No-load maximum hoisting speed (adjustable)	160mm/s
Full load maximum lifting speed (adjustable)	180mm/s
No-load maximum running speed (adjustable)	14km/h
Full load maximum running speed (adjustable)	12km/h
Full load maximum climbing degree	15%
No-load maximum climbing degree	20%
Load center distance	500
Rear wheel specification	18*7-8

OTHER PARAMETERS

driving axle	220-76 cast steel heavy-duty drive axle
Transition bridge	920-160 cast steel suspension integrated heavy-duty steering bridge
illuminating system	LED
Four-wheel walking	solid tyre
body color	Customized matching

HUNDAL

FORKLIFT H30 ELECTRIC

HUNDAL

FORKLIFT H30 ELECTRIC

The Hundal Electric Forklift is simple and easy to operate. There is no need for complicated gear shifting or complex clutch operation. Operators can move forward, reverse, lift, and lower the load by simply controlling the handle.

These electric forklifts are designed to meet different operational needs, including stacking, material handling, loading, and unloading. With a wide range of applications, they are suitable for many types of businesses and industrial environments.

LARGE FOV with a wide-body gantry design. The steel portal frame is made from thickened, high-strength material for improved durability and stronger bearing capacity. The wider molded frame structure provides

STRONG CHAIN

Strong chain design provides reliable lifting support, smooth operation, and improved durability for heavy-duty daily use.

INTEGRATED WELDING

Integrated welding creates a stronger, more stable frame for better durability and support.

Thick forks provide stronger load support, better durability and reliable handling during heavy-duty operation.

LED searchlight

Warning lights are standard, so you can operate freely at night, improve visibility and ensure safe operation.

Luxury comfortable seat

The seat fits the curve of the human body, and the lumbar support area is particularly strengthened, which helps to disperse the pressure on the waist.

Standard hydraulic cylinder

The power core in front of the stable reinforced cylinder has stronger supporting ability, and the larger load lifting is stable, safe and guaranteed.

Solid tyre

Excellent wear resistance, can withstand the heavy pressure and friction of forklift in handling and stacking operations.

DRIVING OPERATION

EFFICIENT AND COST-EFFECTIVE

POWERFUL SAFE

The Hundal H30 Electric Forklift delivers smooth electric performance, strong lifting power, and reliable handling for everyday warehouse and industrial operations.

Electric forklifts are small in size and light in weight, which makes them flexible to operate in narrow spaces. This is an important advantage for enterprises that need to work in limited spaces such as warehouses and production lines.

3000KG
RATED LOAD CAPACITY

3-4DAYS
CAN BE USED FOR
ONE CHARGE

The steering system, hydraulic control system and accelerating braking system of electric forklift are all controlled by electrical signals, which is helpful to improve work efficiency and accuracy.

The energy consumption is much lower than that of internal combustion forklift, and the power cost required for battery charging is much lower than that of fuel.

Control panel

Small diameter steering wheel design, adjustable angle and comfortable feel.

Working display screen

The operation interface is clear at a glance.

Emergency stop switch

In case of emergency, press the emergency stop switch to cut off the power supply of the whole vehicle.

Reflector

Improve the visual field, especially between narrow warehouses and shelves.

Caution light

It can play a variety of roles, such as safety warning, collision prevention, visual prompt and so on.

H30 ELECTRIC

Different Colors can be made available on special request only
